onecom

# Global IoT Platform

*Complete control of your IoT estate*

# The Onecom Global IoT Platform is a complete, hosted solution for managing IoT SIMs and services, wherever deployed.

*IoT solutions needn't be complex. Hundreds, even thousands, of connected devices around the world can be managed easily, in real-time using the Onecom Global IoT Platform.*

*Powered by Vodafone's IoT technology, the Onecom Global IoT Platform delivers total control of your IoT investment.*

*Onecom Global IoT - Features designed to deliver control:*

- Intuitive status dashboard, providing a real-time overview of your estate

- Simple to configure usage alerts, providing usage data

- Downloadable reports (SIM status, assest status, cost and usage)

- Simple, highly-effective user-management tools

# Faster to market

*The Onecom Global IoT Platform can be configured and deployed in as little as five working days.*

*Onecom Global IoT - Flexible and resilient*

- A choice of standard, robust and solderable SIMs

- Data bearer options including GPRS, 3G and 4G/LTE

- Comprehensive international and home-country roaming

- Secure, highly resilient connectivity via IPSEC-VPN

# Futureproof and dynamic

*Designed to accommodate high-specification requirements and fully scalable, the Onecom Global IoT Platform offers unique capabilities:*

- Private APN support and multiple connectivity solutions, including point-to-point circuits

- Comprehensive security options, including IMEI white lists, locks and two-factor authentication

- Solid service interface, including direct app integration via API and SMPP

- Highly intuitive, easy-to-use management portal

# Why Onecom?

Onecom's commitment to its customers is unique. Spending more on customer service than any other independent UK enterprise telecoms provider, by sector, Onecom continues to invest in its support infrastructure and human resource.

To ensure progressive and productive relationships, Onecom customers are assigned dedicated account management representatives and contact channels.

Powered by Vodafone's market-leading IoT technology (Gartner, Magic Quadrant 2016), the Onecom Global IoT Platform is a world-class solution delivered and supported by the UK's leading independent business communications provider.

*The Internet of Things is revolutionising British business. Find out more – talk to the Onecom IoT team on:*
